

## INTERNET ACCESS CUSTOM LINE

Designed for businesses requiring highly efficient Internet services, DFi's CUSTOM LINE is the reference for your business communications. Exclusively managed by Dfi, this leased line service simultaneously allows rapid data transmission and downloading, with no restrictions linked to other providers. The service offers a global « business solution », from planning to the daily upkeep of your connection. CUSTOM LINE is recommended for intensive use of the Internet, requiring optimal quality and guaranteed availability with a backup solution and an emergency access in case of problems.

If the Internet is a strategic resource for your business and a factor of competitiveness for your services, opt for a new and more efficient Internet access with CUSTOM LINE and its options.
