

FTP BUSINESS

EASILY SHARE YOUR FILES WITH YOUR CORRESPONDENTS

FTP BUSINESS is the ideal solution for quickly and safely sharing your files, even large files. Efficient and secure, access to these files, protected by a password, is achieved using the standard FTP (File Transfer Protocol). A simple and intuitive interface is used to create your users and to assign them access rights. Your sensitive files can even be encrypted during transfer. No special installation is required on your workstation; a simple browser is all that is required.

Why choose this service ?

To facilitate the exchange of documents :

- Your exchanges of files with your correspondents are frequent and often large
- Sending files by email often does not work or is not viable

For security and performance :

- Once the files have been sent, you are certain that they are available to your correspondents
- The files can be encrypted during the transfer process
- The size of the files is not limited

Key features

- Standard FTP server accessible in active or passive mode
- FTP server admin console (French / English)
- Creation of users and passwords
- Definition of root directories
- Definition of user rights: reading or, reading and writing
- Resending of the password to the correspondent in case of forgetting
- Tracking activity history on the server
- Encrypted transfer using FTP over SSL
