

## SAFEMAIL

### YOUR ADVANCED LINE OF DEFENCE!

Designed to protect your email system, Safemail eliminates threats endangering your PCs and your information system. This solution, constantly updated and integrated into the DFi servers, protects you against spam, viruses and attacks even before they arrive at your email server. Based on sophisticated filters graded according to your requirements, Safemail controls all your incoming messages.

Without having to change your ISP or your existing email accounts, you can take full advantage of its numerous advantages guaranteeing the reliability and security of your emails. The self-administered platform and the functionalities offered translate into a wide range of operational privileges and technological benefits.

### Your advantages

- Proven performance and efficiency •
- Advanced security and protection •
- Total control •
- Continual functioning •

### Why choose the SafeMail service?

#### To streamline your costs:

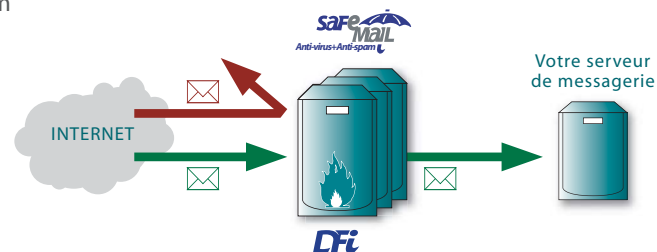

- Avoids costly investment
- Optimum quality/price ratio
- Adapts to any system without installation
- No additional maintenance costs or computer program

#### To increase your efficiency and security:

- Enhanced protection for your email system
- Prevents looting of your email addresses
- A tool complementary to any traditional antivirus
- Rapid activation (less than one hour)
- Daily automatic updates
- Solution compatible with hosting by another supplier and with different email servers (MS Exchange, Lotus Notes, etc.)
- Ease of use through a simple and ergonomic interface
- Autonomous settings of the different filters and options
- Daily, monthly and annual statistics
- Access to the stopped emails
- Automatic management of the actions

#### To increase your performance:

- Uninterrupted computer processing
- Temporary conservation of the emails in case of downtime of your server
- Reduction in the number of emails to be processed due to the rejection of the spam emails before they arrive on your server
- Advice and supervision by the Hot Line service included.

## Customer Feedback

« As soon as we installed Safemail, almost all of my colleagues noticed the decrease of unwanted e-mails. »  
Stefan BECK, Flybaboo SA, Geneva

### Choose this service, but when?

- You want to buy anti-spam software
- You must renew your anti-spam license
- You are installing an internal email server
- A provider who does not offer a reliable anti-virus/anti-spam tool hosts your email system
- Your server no longer has the capacity to absorb all your emails
- You want to take advantage of the infrastructure and the solutions of a single internet provider offering a comprehensive security concept.
